ANDROID

Manage and publish content on all your Android-powered displays With SimSign.

LINUX

Manage and publish content on all your Linux-powered displays With SimSign.

SamSung

Manage and publish content on all your SamSung-powered displays With SimSign.

Samsung Benefits:

Integrated System:
Samsung displays running Tizen OS often come with built-in digital signage functionality, eliminating the need for external media players.

High Performance:
Optimized for Samsung hardware, leading to smoother operation, higher resolution displays, and reliable performance.

Remote Content Management:
The Samsung SimSign offers comprehensive content management and scheduling, including remote device management.

WebOS Benefits:

LG

Embedded Solution:
Like Samsung’s Tizen, WebOS is built into LG's commercial-grade displays, meaning there’s no need for external media players.

Streamlined Setup:
WebOS-based displays have a simple plug-and-play capability, reducing installation complexity.

User-Friendly Interface:
LG’s WebOS platform provides an intuitive interface for content management, making it easy for businesses to manage digital content without extensive technical expertise.

Linux Benefits:

Supports Various Media Players:
Linux is compatible with numerous digital signage media players (such asRaspberry Pi,BrightSign, or custom-built players).

Lightweight and Resource-Efficient:
Linux can run on lower-spec hardware without sacrificing performance, making it suitable for less powerful, more affordable media players.

Stability and Security:
Linux is known for its robust security and stability, ensuring reliable, long-term operation with minimal crashes or downtime.

Android Benefits:

Cost-Effective:
Android devices, including tablets, TVs, and set-top boxes, are typically more affordable, making it a cost-effective solution for smaller businesses.

Wide Range of Devices:
Android can run on a broad spectrum of devices, giving users flexibility in choosing their hardware based on price and performance needs.

Third-Party CMS Compatibility:
Android is compatible with numerous content management systems (CMS), providing versatility in managing signage content.
